

Pricing Guide 2026 Service Menu

AI automation, product engineering, web platforms, mobile apps, SaaS subscriptions and growth marketing.

What this guide covers

Package tiers, pricing ranges, deliverables, timelines, optional add-ons and operating terms.

Who this guide is for

Startups, SMEs, enterprise teams, schools, clinics and brands seeking reliable digital systems.

How we price

Global clients are billed in USD. Ethiopia and East Africa are billed in ETB using purchasing-power parity.

GEOGRAPHIC PRICING POLICY

Global market in USD. Ethiopia and East Africa in ETB.

Contact: nahomgwmichael@gmail.com | +251944191603 | t.me/NovaTechET | novatech23.vercel.app

How to Use This Guide

This document is designed to help potential clients quickly understand what NovaTechAI builds, how our projects are priced and what is included at each service tier. The figures below are budget ranges, not rigid one-size-fits-all quotations. Final proposals are adjusted based on scope, integrations, data complexity, delivery speed and post-launch support requirements.

What every client receives	What affects final price
- Discovery conversation to understand goals, users, constraints and business model. - Written scope summary with deliverables, timeline and payment milestones. - Responsive design and implementation aligned to your brand and use case. - Project communication and progress checkpoints during build. - Launch support, basic handover and admin training for the delivered system.	- Number of screens/pages and design complexity. - Custom integrations such as payment gateways, CRMs, analytics, maps or ERP systems. - AI complexity: rule-based automation vs multi-agent workflows vs secure enterprise deployments. - Need for multilingual content, custom dashboards, roles/permissions or reporting. - Urgency, security requirements, testing depth and post-launch support level.

Typical Engagement Flow

1. Discovery Brief call, requirements gathering and opportunity assessment.	2. Proposal We provide recommended package, scope, timeline and commercial terms.	3. Build Design, development, QA and milestone reviews.
4. Launch Deployment, handover, training and basic stabilization support.	5. Growth Optional ads, SEO, app marketing and optimization retainers.	6. Long-term support Maintenance, hosting, monitoring and upgrades.

Geographic pricing policy

Global clients are billed in USD. Ethiopia and East Africa are billed in ETB. We use purchasing-power parity so startups and institutions in our local market can access strong engineering without enterprise-level offshore pricing.

Guide Map

No.	Section	What you will learn
01	Advanced AI Services Architecture	Workflow audit, automation tiers, monthly retainers and value-based pricing options.
02	Web Design & Development + Marketing	Starter, Growth and Enterprise website packages with optional advertising support.
03	Mobile Application Development	Utility apps, e-commerce / booking apps, FinTech / SaaS apps and AI integration premium.
04	Mobile App Marketing	ASO, install campaigns, acquisition tracking and user retention packages.
05	Management SaaS Subscriptions	School, clinic / hospital and property management systems.
06	Add-Ons & Operational Policies	Hosting, maintenance, branding, copywriting, photography and project/payment terms.
07	Qualification Checklist	Questions to answer before asking for a final quotation.

Best way to use this guide

Start with the section closest to your current need. If you are still unsure, review the qualification checklist at the end and contact us with your goals, timeline and budget range. We can then recommend the best package and customize it for you.

01. Advanced AI Services Architecture

AI work is not best priced by simple hourly billing. The value lies in the automation system we design, the business bottleneck we remove and the ongoing infrastructure required to keep the system reliable. For that reason, our AI commercial model combines a paid audit, a system implementation fee and, where relevant, an ongoing retainer for hosting, API costs, monitoring and iterative improvement.

Phase 1: Workflow Audit

Every serious AI project begins with a paid audit. We map your internal workflows, study the data sources your team already uses, identify repetitive manual tasks and determine whether your use case needs simple automation, an AI assistant, a multi-agent system or a secure enterprise deployment.

Audit pricing

Market	Price range	What is delivered
Global	\$2,500 – \$10,000 USD	Workflow analysis, automation roadmap, system blueprint and implementation recommendation.
Local	150,000 – 600,000 ETB	Workflow analysis, automation roadmap, system blueprint and implementation recommendation.

Typical audit outputs

- Current-state process map showing bottlenecks and handoff delays.
- List of priority workflows recommended for automation.
- Data-readiness review: files, CRM, forms, documents and APIs available.
- Recommendation on security model, hosting model and AI tooling.
- Commercial estimate for implementation and ongoing support.

Common AI use cases

- Customer support chatbots and knowledge assistants.
- Lead capture, qualification and routing automation.
- Document generation and proposal drafting systems.
- Internal team assistants for operations, HR or finance tasks.
- Voice agents, ticket automation and business intelligence copilots.

AI Implementation Tiers

Implementation tiers

Tier	Best for	Typical scope	Global	Local
Tier 1: Foundational Automation	Small businesses	Setup in 2–4 weeks. Customer support chatbots, lead-routing tools, FAQ assistants and simple internal workflow automation.	\$2,000 – \$15,000 setup + \$200 – \$1,000/mo	120,000 – 900,000 ETB setup + 12,000 – 60,000 ETB/mo
Tier 2: Operational Intelligence	Mid-market firms	Setup in 2–4 months. Multi-department automation, CRM integration, document generators, agent handoffs and analytics workflows.	\$20,000 – \$80,000 setup + \$2,000 – \$8,000/mo	1,200,000 – 4,800,000 ETB setup + 120,000 – 480,000 ETB/mo
Tier 3: Enterprise Agentic Systems	Large organizations	Setup in 6–12 months. Autonomous workflows, local models, air-gapped deployments, enterprise governance and strict data protection.	\$100,000 – \$300,000+ setup + \$10,000 – \$25,000+/mo	6,000,000+ ETB setup + 600,000+ ETB/mo

Value-based pricing options

For highly measurable projects, we can price based on business outcomes instead of engineering effort. Example: if our AI saves \$180,000 per year in manual labor, we may charge 15%–20% of that value. We also offer performance pricing models such as paying per appointment booked, per qualified lead routed or per support ticket resolved.

What the retainer covers

AI retainers typically cover cloud infrastructure, model/API usage, prompt and workflow tuning, uptime monitoring, incident response, model updates, dashboard improvements and light iteration based on real usage data.

02. Web Design & Development + Marketing

Our websites are designed to be more than static brochures. We build modern user experiences that support credibility, lead generation, sales conversations and long-term content growth. Every web package includes responsive implementation, basic SEO hygiene and launch support, with higher tiers adding conversion tools, structured content systems and advanced integrations.

Website packages

Package	Ideal clients	Timeline	Global	Local	Core deliverables
Digital Presence	Consultants, personal brands, small NGOs, local startups	2–3 weeks	\$1,000 – \$3,000	20,000 – 35,000 ETB	5–7 pages, responsive build, CMS, WhatsApp/call buttons, basic SEO, Google Maps/Profile integration.
Growth & Conversion	Tour operators, real estate, construction, import/export	4–5 weeks	\$5,000 – \$12,000	45,000 – 75,000 ETB	15–20 pages, listing system, lead funnels, GA4/Search Console, advanced SEO foundation, testimonials/social proof.
Enterprise	E-commerce, hotels, bureaus, large organizations	6–8 weeks	\$20,000 – \$50,000	90,000 – 150,000+ ETB	Custom UI/UX, scalability, multi-language, advanced search/filtering, payment gateways, CRM/API integration, security hardening.

Starter package includes	Growth package adds	Enterprise package adds
• Home, About, Services, Contact and Blog/Gallery pages. • Mobile-friendly design for phones, tablets and desktops. • Floating WhatsApp and click-to-call buttons. • WordPress or similar CMS for content updates. • Meta titles/descriptions and image tagging. • Basic speed/security setup.	• Service-specific landing pages and deeper site architecture. • Dynamic listings for tours, properties, vehicles or projects. • Quote/request forms with conditional logic. • GA4, Search Console and event tracking setup. • Local keyword optimization and social proof modules.	• Custom interface designed from scratch in Figma. • Complex filtering, search and database architecture. • Payment gateways like Telebirr, Chapa, CBE Birr or PayPal. • CRM or ERP integration and automations. • Advanced security, backups and enterprise-grade deployment design.

Optional Web Growth Packages

Monthly marketing add-ons

Package	Focus	Global	Local	Spend structure	What is included
Visibility Boost	Brand awareness and local reach	\$300 / month	8,000 ETB / month	\$200 or 5,000 ETB ad spend + \$100 or 3,000 ETB management	1 active Meta campaign, localized targeting and monthly report.
Lead Generator	Traffic and lead capture	\$1,000 / month	28,000 ETB / month	\$700 or 20,000 ETB ad spend + \$300 or 8,000 ETB management	2–3 targeted campaigns, Meta Pixel, GTM, basic retargeting and bi-weekly optimization.
Market Dominator	Sales and ROAS optimization	\$3,000+ / month	65,000+ ETB / month	\$2,500+ or 50,000+ ETB ad spend + \$500 or 15,000 ETB management	Multi-platform campaigns, A/B testing, conversion tracking, dashboards and weekly strategy calls.

Important marketing note

Ad spend is separate from management. The spend portion is paid to Meta/Google. If you do not have a card that can run ad spend internationally, we can handle it on your behalf for a 15%–20% handling fee to cover forex and processing logistics.

03. Mobile Application Development

We build high-performance mobile applications tailored for Ethiopian and international markets using cross-platform frameworks such as Flutter or React Native, and native technologies where needed. Our approach emphasizes usability, clean architecture, payment and API integration readiness and strong back-office control for operations teams.

App development packages

Package	Ideal clients	Timeline	Global	Local	Typical features
Basic Utility / Informational App	Content creators, media, directories, service catalogs	4–6 weeks	\$15,000 – \$25,000	120,000 – 180,000 ETB	Cross-platform app, intuitive UI/UX, push notifications, offline reading, social login and basic admin panel.
Business & E-Commerce Application	Retail, delivery, booking, ride-hailing, food delivery	8–12 weeks	\$30,000 – \$50,000	250,000 – 450,000 ETB	User/vendor profiles, cart and checkout, local payments, maps/geolocation, order notifications and super admin dashboard.
Enterprise / FinTech / Custom SaaS App	Tech startups, FinTech, complex enterprise operations	16+ weeks	\$120,000+ (custom)	500,000+ ETB (custom)	Secure backend, multi-role systems, real-time sync, biometric login, analytics, heavy API integrations and deeper QA/security testing.

AI integration premium

Adding AI to a custom mobile app introduces additional data, infrastructure and product complexity. Basic AI integrations typically add \$10,000–\$50,000 USD (600,000–3,000,000 ETB) to base cost. Deep architectural AI integrations typically add \$50,000–\$150,000 USD (3,000,000–9,000,000 ETB).

Common deliverables	Typical client decisions required
- UI design system and core app screens. - Authentication and account flows. - Admin or back-office management tools. - App store build preparation and deployment support. - QA pass for major flows and supported devices.	- Do you need Android only or Android + iOS? - Will you accept online payments or cash-on-delivery? - What roles must exist: user, vendor, rider, admin, manager? - What integrations are mandatory: maps, SMS, payment, CRM, analytics? - Do you need multilingual support or offline mode?

04. Mobile App Marketing

App growth requires more than a good build. We help new apps improve visibility, drive installs and retain active users through store optimization, install campaigns, analytics and lifecycle marketing.

Monthly app marketing packages

Package	Global	Local	Spend structure	Key deliverables
App Launch & Visibility Setup	\$400 / month	10,000 ETB / month	\$200 or 5,000 ETB ad spend + \$200 or 5,000 ETB management	Basic ASO for Google Play and Apple App Store plus 1 install-focused Meta campaign.
Growth & Acquisition	\$1,000 / month	30,000 ETB / month	\$700 or 20,000 ETB ad spend + \$300 or 10,000 ETB management	Advanced ASO, Meta + Google App Campaigns and app tracking setup (AppsFlyer/Firebase).
App Scaling & User Retention	\$3,000+ / month	65,000+ ETB / month	\$2,500+ or 50,000+ ETB ad spend + \$500 or 15,000 ETB management	Influencer support, event tracking, retargeting campaigns and push-notification optimization.

Success metrics we track

Depending on your app type, we track installs, cost per install, registration rate, activation, first purchase, retention, daily/weekly active users and re-engagement performance. This helps clients understand not just how much is being spent, but whether the marketing is actually improving business outcomes.

05. Custom Management Solutions (SaaS Subscriptions)

For organizations that need a working management system without funding a large custom build upfront, we offer hosted subscription-based platforms. These are ideal for institutions that value faster onboarding, lower initial investment and predictable support.

Subscription systems

Solution	Global pricing	Local pricing	Core modules
Smart School Management System	\$1,500 setup + \$300–\$500 monthly	15,000 ETB setup + 5,000–10,000 ETB monthly	Admissions, student records, timetable, grading, report cards, fee tracking, parent portal and HR/payroll.
Hospital / Clinic Management System	\$2,500 setup + \$500–\$1,000 monthly	25,000 ETB setup + 8,000–15,000 ETB monthly	Electronic health records, appointments, queueing, billing, inventory/pharmacy and laboratory module.
Property Management System	\$1,000 setup + \$200–\$400 monthly	10,000 ETB setup + 4,000–8,000 ETB monthly	Tenant portal, lease tracking, automated rent reminders and maintenance ticketing.

Best for organizations that need	Operational notes
- Faster implementation and training. - Lower upfront cost than fully custom development. - Cloud hosting, updates and support under one provider. - Reliable day-to-day administration for schools, clinics or properties.	- Subscriptions are usually billed annually for continuity and predictable support. - Setup fees cover configuration, user onboarding and training. - Customization beyond standard modules may require additional implementation fees. - Data migration complexity can affect onboarding timeline and cost.

06. Add-Ons & Operational Policies

Additional services

Service	Global	Local	Notes
Domain & Cloud Hosting	\$100 – \$200 / year	4,000 – 8,000 ETB / year	Domain, SSL certificate and high-speed cloud server.
Annual Web Maintenance	\$500 – \$1,000 / year	10,000 – 20,000 ETB / year	Security patches, plugin updates, backups and minor content changes.
App Store Developer Accounts	\$125 / year	4,500 ETB / year	Apple App Store and Google Play Store account setup costs.
Logo & Visual Identity	\$300 – \$800	8,000 – 15,000 ETB	Custom logo, typography, color palette and brand guidelines.
Professional Copywriting	\$50 – \$150 / page	800 – 1,500 ETB / page	SEO-oriented and conversion-focused writing in English and/or Amharic.
Commercial Photography	Custom quote	Custom quote	On-location photo production for products, teams or real estate.

Development terms	Marketing terms	SaaS subscription terms
40% upfront deposit. 30% after design/prototype approval. 30% before final go-live. - Client owns custom design assets, code and content after final payment. - Up to 2 hours of admin training included.	- Ad management fees and ad spend are prepaid monthly. - Month-to-month packages are available, but 3 months is recommended for meaningful optimization. - Handling fees apply if we process ad spend on your behalf.	- Typically billed annually for continuity of service. - Includes hosting stability and year-round support expectations. - Major customizations or integrations may be quoted separately.

07. Client Qualification Checklist

The clearer your brief is, the more accurate and useful our quotation will be. Before requesting a final proposal, prepare answers to the questions below.

Business context	Project scope
- What does your business do and who is the target customer? - What is the main problem you want this project to solve? - Are you serving Ethiopia/East Africa or a global market? - Do you already have a brand identity, website, app or existing system?	- What are the must-have features? - Are there any integrations required: payments, maps, CRM, ERP, analytics, APIs? - Do you need an admin dashboard or multiple user roles? - Is multilingual support needed?
Commercial fit	Delivery planning
- Do you have a budget range in mind? - Is this a one-time build, or do you need monthly support/marketing? - Would a subscription model fit better than a fully custom project? - Do you prefer ETB or USD billing based on your market?	- When do you need to launch? - Who on your side will review designs and approve milestones? - Do you already have content, product data, images or documents? - Will you require staff training after launch?

Ready for a custom quote?

Send us your project summary, target launch timeline and preferred budget range. We will recommend the best package, identify any add-ons or integrations required and convert the range in this guide into a tailored quotation for your business.
