Executive Summary

NovaTech AI is positioned as an AI-first automation consultancy in Addis Ababa, delivering agentic workflows, private AI deployments, browser automation, web platforms, mobile apps and SaaS products. This guide packages those services into clear tiers for local and global clients.

Pricing principle

Every quote should start by identifying business value, implementation complexity, data readiness, integrations, timeline pressure and whether the client is in the Global Market or Local Market.

Category	Entry Level	Growth / Mid-Market	Enterprise / Custom
AI Automation	\$2,000-\$15,000 setup + \$200-\$1,000/mo 120,000-900,000 ETB setup + 12,000-60,000 ETB/mo	\$20,000-\$80,000 setup + \$2,000-\$8,000/mo 1.2M-4.8M ETB setup + 120,000-480,000 ETB/mo	\$100,000-\$300,000+ setup + \$10,000-\$25,000+/mo 6M+ ETB setup + 600,000+ ETB/mo
Web Development	\$1,000-\$3,000 20,000-35,000 ETB	\$5,000-\$12,000 45,000-75,000 ETB	\$20,000-\$50,000 90,000-150,000+ ETB
Mobile Apps	\$15,000-\$25,000 120,000-180,000 ETB	\$30,000-\$50,000 250,000-450,000 ETB	\$120,000+ 500,000+ ETB
Marketing Retainers	\$300-\$400/mo 8,000-10,000 ETB/mo	\$1,000/mo 28,000-30,000 ETB/mo	\$3,000+/mo 65,000+ ETB/mo
SaaS Subscriptions	\$200-\$500/mo 4,000-10,000 ETB/mo	\$500-\$1,000/mo 8,000-15,000 ETB/mo	Custom enterprise licensing

Use this guide for: sales conversations, proposal preparation, discovery calls, and client education. Prices are starting ranges and should be finalized only after scoping, audit, or prototype approval.

Guide Map

01	Advanced AI Services Architecture	Workflow audit, automation tiers, retainers and value-based pricing.
02	Web Design & Development + Marketing	Starter, Growth and Enterprise websites with optional ad packages.
03	Mobile App Development	Cross-platform apps, e-commerce apps, FinTech/SaaS apps and AI integration premiums.
04	Mobile App Marketing	ASO, install campaigns, tracking, acquisition and retention.
05	Management SaaS Subscriptions	School, clinic/hospital and property management systems.
06	Add-Ons & Operational Policies	Hosting, maintenance, branding, copywriting, payment milestones and terms.
07	Sales Qualification Checklist	Questions to ask before quoting a client.

01. Advanced AI Services Architecture

NovaTech sells AI systems through a hybrid model: paid workflow audit, fixed implementation setup, monthly retainer and value-based pricing where the ROI is measurable. This avoids hourly billing that penalizes speed and automation expertise.

Phase	Scope	Global Market	Local Market
Workflow Audit	Map daily tasks, identify manual bottlenecks, review data quality, classify workflows, and deliver an automation roadmap plus system blueprint.	\$2,500-\$10,000	150,000-600,000 ETB

System implementation begins only after the audit clarifies data readiness, workflow value, security needs and integration complexity.

Tier	Best For	Typical Systems	Timeline	Global Setup + Retainer	Local Setup + Retainer
Tier 1: Foundational Automation	Small businesses	Customer support chatbots, lead routing tools, basic internal workflow automation.	2-4 weeks	\$2,000-\$15,000 setup \$200-\$1,000/mo	120,000-900,000 ETB setup 12,000-60,000 ETB/mo
Tier 2: Operational Intelligence	Mid-market firms	Multi-agent systems, department workflows, CRM integrations, custom document generation.	2-4 months	\$20,000-\$80,000 setup \$2,000-\$8,000/mo	1.2M-4.8M ETB setup 120,000-480,000 ETB/mo
Tier 3: Enterprise Agentic Systems	Large organizations	Fully autonomous systems, private deployments, local or air-gapped AI models, enterprise governance.	6-12 months	\$100,000-\$300,000+ setup \$10,000-\$25,000+/mo	6M+ ETB setup 600,000+ ETB/mo

Value-based option	For measurable savings, charge 15%-20% of verified annual savings. For revenue operations, use performance fees per qualified appointment, solved ticket, processed document or completed workflow.
--------------------	---

02. Web Design & Development + Digital Marketing

Websites act as the visible interface for NovaTech's product engineering and AI backends. Packages scale from credibility websites to dynamic sales systems and enterprise platforms.

Digital Presence - Starter	Growth & Conversion - Recommended	Enterprise - Custom
Best for: Consultants, personal brands, small NGOs and local startups Timeline: 2-3 weeks Global: \$1,000-\$3,000 one-time Local: 20,000-35,000 ETB one-time Included: 5-7 core pages, responsive design, WhatsApp and click-to-call, CMS, basic SEO, maps, security and speed setup.	Best for: Tour operators, real estate agencies, construction firms and import/export businesses Timeline: 4-5 weeks Global: \$5,000-\$12,000 one-time Local: 45,000-75,000 ETB one-time Included: Starter plus 15-20 pages, dynamic listings, lead funnels, advanced local SEO, GA4/Search Console, testimonials and feeds.	Best for: E-commerce, hotels, bureaus and multi-national corporations Timeline: 6-8 weeks Global: \$20,000-\$50,000 one-time Local: 90,000-150,000+ ETB one-time Included: Custom UI/UX, scalable architecture, multilingual support, advanced filtering, payment APIs, CRM/ERP integrations and cloud backups.

Marketing Add-On	Strategy	Global Market	Local Market	Deliverables
Visibility Boost	Brand awareness and local reach.	\$300/mo (\$200 ad spend + \$100 management)	8,000 ETB/mo (5,000 ad spend + 3,000 management)	1 active Meta campaign, basic audience targeting, monthly performance report.
Lead Generator	Traffic and lead capture.	\$1,000/mo (\$700 ad spend + \$300 management)	28,000 ETB/mo (20,000 ad spend + 8,000 management)	2-3 campaigns, Meta Pixel, Google Tag Manager, basic retargeting, bi-weekly optimization.
Market Dominator	Sales, ROAS and full-funnel domination.	\$3,000+/mo (\$2,500+ ad spend + \$500 management)	65,000+ ETB/mo (50,000+ ad spend + 15,000 management)	Unlimited Meta/Google campaigns, A/B testing, conversion tracking, weekly calls, Looker Studio dashboards.

03. Mobile Application Development

NovaTech builds cross-platform Flutter/React Native and native mobile applications for local and global markets. Projects are priced by platform complexity, backend depth, integrations, data security and QA requirements.

Package	Ideal For	Timeline	Global Market	Local Market	Feature Set
Basic Utility / Informational App	Content creators, news portals and service directories.	4-6 weeks	\$15,000-\$25,000	120,000-180,000 ETB	Cross-platform app, intuitive UI/UX, push notifications, offline reading mode, social login and basic admin panel.
Business & E-Commerce Application	Retailers, delivery services and booking platforms.	8-12 weeks	\$30,000-\$50,000	250,000-450,000 ETB	User/vendor profiles, cart and checkout, Telebirr/Chapa/mobile banking, Google Maps, advanced push notifications and super admin dashboard.
Enterprise / FinTech / Custom SaaS App	Large startups, FinTech and enterprise operations.	16+ weeks	\$120,000+	500,000+ ETB	Secure custom backend, user roles, real-time sync, biometric login, analytics, third-party APIs and QA/penetration testing.

AI Integration Premium	Global Market	Local Market	Notes
Basic AI models inside custom mobile apps	\$10,000-\$50,000 add-on	600,000-3,000,000 ETB add-on	Use for smart recommendations, AI search, classification, chat assistants or document extraction.
Deep architectural AI integrations	\$50,000-\$150,000 add-on	3,000,000-9,000,000 ETB add-on	Use for complex agentic systems, private model hosting, advanced analytics and mission-critical AI workflows.

A mobile app quote should also account for developer accounts, app review cycles, device testing, payment provider approvals and ongoing maintenance.

04. Mobile App Digital Marketing

App growth focuses on installs, activation, retention and in-app events. These packages include ASO, install campaigns, tracking setup and retargeting based on the client's maturity level.

Package	Global Market	Local Market	Deliverables
App Launch & Visibility Setup	\$400/mo (\$200 ad spend + \$200 management)	10,000 ETB/mo (5,000 ad spend + 5,000 management)	Basic Google Play and Apple App Store optimization, keyword/title/description improvement, 1 install-focused Meta campaign.
Growth & Acquisition	\$1,000/mo (\$700 ad spend + \$300 management)	30,000 ETB/mo (20,000 ad spend + 10,000 management)	Advanced ASO, screenshot/icon testing, Meta Ads + Google App Campaigns, Firebase or AppsFlyer tracking, CPI optimization.
App Scaling & User Retention	\$3,000+/mo (\$2,500+ ad spend + \$500 management)	65,000+ ETB/mo (50,000+ ad spend + 15,000 management)	Multi-platform acquisition, influencer management, in-app event tracking, inactive user retargeting and push-notification optimization.

Reporting recommendation	For every app campaign, define CPI, activation rate, daily active users, retention, purchases and revenue events before ad spend begins.
--------------------------	--

05. Custom Management SaaS Subscriptions

For institutions that do not want a large upfront build, NovaTech can offer hosted, maintained and secure cloud software with setup, training and annual subscription billing.

System	Setup Fee	Subscription	Core Modules
Smart School Management System	\$1,500 or 15,000 ETB	\$300-\$500/mo or 5,000-10,000 ETB/mo, billed annually	Admissions and student records, timetables, grading, report cards, tuition invoices, Telebirr/CBE parent payments, parent/student portals, HR and payroll.
Hospital & Clinic Management System	\$2,500 or 25,000 ETB	\$500-\$1,000/mo or 8,000-15,000 ETB/mo, billed annually	EHR, appointment and queue management, billing and insurance, pharmacy inventory, batch/expiry alerts, lab results linked to doctor and patient portals.
Real Estate / Property Management System	\$1,000 or 10,000 ETB	\$200-\$400/mo or 4,000-8,000 ETB/mo, billed annually	Tenant portals, lease tracking, rent reminders through SMS, payment tracking and maintenance request ticketing.

Subscriptions should include hosting, system monitoring, security patches, backups and technical support. Customization, branch rollouts, data migration and integrations should be scoped separately.

06. Additional Services, Add-Ons and Policies

These services complete the delivery stack and should be included or quoted separately depending on client readiness.

Service	Global Market	Local Market	Notes
Domain & Cloud Hosting	\$100-\$200/year	4,000-8,000 ETB/year	Domain, SSL certificate and high-speed cloud server.
Annual Web Maintenance	\$500-\$1,000/year	10,000-20,000 ETB/year	Security patches, plugin updates, daily backups and minor content changes.
App Store Developer Accounts	\$125/year	About 4,500 ETB/year	Apple App Store and Google Play Store setup fees.
Logo & Visual Identity	\$300-\$800	8,000-15,000 ETB	Logo, typography, color palette and brand guidelines.
Professional Copywriting	\$50-\$150/page	800-1,500 ETB/page	SEO-optimized, conversion-focused writing in English and Amharic where needed.
Commercial Photography	Custom quote	Custom quote	On-location professional shoots for products, staff or real estate.

- Development payment terms:** 40% upfront deposit, 30% after design/prototype approval and 30% before final deployment/go-live.
- Ownership:** After final payment, the client owns the custom design assets, website code and content created for the project.
- Training:** Up to 2 hours of admin training is included with development packages unless a larger training program is scoped.
- Digital marketing billing:** Management fees and ad spend are prepaid monthly. Ad spend should ideally be paid directly by the client to Meta/Google. If NovaTech processes ad spend due to card or forex limitations, add a 15%-20% handling fee.
- Commitment:** Marketing is month-to-month, but a 3-month minimum is recommended for data collection, optimization and reliable ROI evaluation.
- SaaS billing:** School and hospital subscriptions are typically billed annually to maintain uninterrupted service, server stability and dedicated year-round support.

07. Sales Qualification Checklist

Use these questions before quoting so the price reflects real value, risk and delivery effort.

Area	Questions to Ask
Business Goal	What revenue, cost-saving or operational result should this project create? What happens if it is not solved?
Market	Is the company headquartered in the Global Market or Local Market? Which currency will be used for billing?
Scope	How many users, pages, workflows, screens, departments, branches, languages or integrations are required?
Data Readiness	Where is the data today? Is it structured, clean, accessible and safe to connect to AI or SaaS systems?
Integrations	Which tools, CRMs, ERPs, payment systems, messaging channels, Google products or banking APIs must connect?
Security	Does the client need private deployment, role-based access, audit logs, encryption, backups, penetration testing or compliance review?
Growth	Will NovaTech also manage ads, SEO, ASO, funnels, reporting dashboards or retention campaigns?
Operations	Who approves designs, content, legal documents, app store listings, payment integrations and final go-live?

Quoting rule

Quote ranges are appropriate in early conversations. Final proposals should include deliverables, exclusions, assumptions, timeline, payment schedule, support terms and approval milestones.

Next Step: Book a Workflow Audit or Discovery Call

For AI automation and complex software projects, begin with a paid workflow audit. For web, mobile and marketing projects, begin with a structured discovery call and a scope confirmation document.

Step	What Happens	Output
1. Discovery	Understand business model, target users, pain points, budget, timeline and success metrics.	Initial recommendation and budget range.
2. Audit / Scope	Map workflows, review data, list integrations and confirm technical architecture.	Blueprint, roadmap, final quote and milestones.
3. Design / Prototype	Prepare UI direction, user flows, technical proof-of-concept or automation mockup.	Approved prototype and implementation plan.
4. Build / Implement	Develop the system, configure integrations, test workflows and prepare content/data.	Working product or automation system.
5. Launch / Optimize	Deploy, train users, monitor performance and improve based on real usage.	Go-live, reports, support and growth plan.

NovaTech AI Systems	Addis Ababa, Ethiopia
